

Problem Statement – if ... else statement in python

Problem 1: Electricity Bill Discount

Problem Statement

An electricity provider offers a **10% discount** on the total bill amount if the customer's bill is **₹5,000 or more**. Otherwise, no discount is applied.

Write a Python program to accept the total bill amount from the user and display the final amount to be paid.

Sample Input 1

Enter the electricity bill amount: 6200

Sample Output 1

Discount Applied!

Final Bill Amount: ₹5580.0

Sample Input 2

Enter the electricity bill amount: 4200

Sample Output 2

No Discount Applied!

Final Bill Amount: ₹4200

Problem 2: Parking Fee Waiver

Problem Statement

A shopping mall waives the parking fee if a customer has made purchases worth **₹2,000 or more**. Otherwise, the customer must pay a parking fee of **₹100**.

Write a Python program to accept the purchase amount and display whether the parking fee is waived or payable.

Sample Input 1

Enter the purchase amount: 2500

Sample Output 1

Parking Fee Waived!

Parking Fee: ₹0

Sample Input 2

Enter the purchase amount: 1500

Sample Output 2

Parking Fee Applicable!

Parking Fee: ₹100

Problem 3: Loan Eligibility Check

Problem Statement

A bank considers an applicant eligible for a personal loan only if their monthly salary is **₹30,000 or more**.

Write a Python program to accept the applicant's monthly salary and display whether they are eligible to apply for the loan.

Sample Input 1

Enter your monthly salary: 45000

Sample Output 1

Congratulations! You are eligible to apply for the loan.

Sample Input 2

Enter your monthly salary: 22000

Sample Output 2

Sorry! You are not eligible to apply for the loan.
